LAW EXCLUDING **ALIENS MAYBAR** CONCERTS HERE &

Many Boston Symphony Players, Including Leader, Are Not Naturalized.

Issuance of the alien enemy act by the President may result in the cancellation of the next concert of the Boston Symphony Orchestra in the District, since it is certain that many leading soloists of that organization clearly come under the ban of ization clearly come under the ban of those deemed undesirable in Wash-

Dr. Karl Muck, whose refusal to Dr. Karl Muck, whose refusal to p ay the National Anthem at his early concert brought about wide discus-sion and later a reconsideration by the director, is clearly under the ban. So are a number of leading instrumental soloists with the organ-

Booked to Play Here.

The orchestra is booked at the Na-tional Theater for a December date, but the strict enforcement of the act will keep many of the leading players from participating in the Washington concert, even if the booking is retained.

act will keep many of the leading players from participating in the Washington concert, even if the booking is retained.

The alien enemy act will not cripple the membership of the Philadelphia and New York orchestras. They are union organizations and in order to become a member of the union, a foreign-born player must be a naturalized citizen.

T. Arthur Smith, who has charge of much of the booking for musicales, concerts and recitals at the Capital said that it was doubtful if more than a few of the dates which have been booked would be canceled.

Agents Seek Aliens.

Agents Seek Aliens.

Department of Justice agents are fast rounding up the list of those who will take their departure from the Carltan With the aid of the the Capital. With the aid of the membership lists of some of the strong German clubs and the information available from the draft cards, the secret service men have been able to locate practically all unnaturalized

Germans and they will be served with notice to move at once. Much comment has been caused by the fact that the German women are not obliged to leave Washington and a number of members of Congress believe that the act should be amend-ed to compel their departure.

It is pointed out by the Department of Justice-that in the majority of cases of those to be deported from Washington the women voluntarily elect to follow the men and little trouble is expected from the activities of German women spies who may elect to remain in Washington.

GREEK LETTER CLUBS HAVE BUSY SEASON

Fraternities and Sororities at G. W. U. Plan Many Entertainments.

Fraternities and sororities at George Washington University are in the midst of the busiest social season in their history. The increased activities are due directly to the war, special forms of entertainment being devised for fraternity men now at the training camps in and near Washington. Teas, dances, smokers, receptions, box parties, luncheons and dinners are being given daily. Those fraternity houses that have rooms to rent to members are filled and all have long waiting lists.

Three fraternities have just an-

Three fraternities have just announced the pledging of new members, and two fraternities have reported the initiation of pledges. fraternities have just an-

The Red Haired Girl's Day.

There is a run on henna at the drug stores. Someone from the West has declared that the red haired girls lead them all when it position. He gives a kindly tip to young men who contemplate matrimony and advises them to mate with a girl with russet tresses. According to this man, rd haired girls are the most efficient and sweet tempered, and any man who has the courage to make a statement like that ought to know what he's talkthat ought to know ing about. But, getting down to brass tacks, some brunette says the man who made the statement has a red headed wife and he must he trying to square himself for hedtime.—Pittsbe trying to square himself for staying out after bedtime.—Pitts-

Return of the Primitive.

A peculiar instance brought about by war conditions is the revival of a number of old-fashioned manufacturing methods abroad which have been dormant for centuries. This is especially true the paper industry in France. The French press has been so hard put to it to produce newsprint that several paper mills, some of which date back to the Sixteenth Century, have been again put in operation. The mechanical pulp is simply made by grinding wood with a millstone, which is set in rotation by water power. The mixing and drying out process is carried on by hand. Up-France have als and mo

tive power INSTRUMENTS OF RECISION.
